Advance in Prices Reflects Real Improvement in Trading Sentiment.

THE SHORT INTEREST UNEASY

Rise, However, Did Not Bring Out Important Offerings for Sale.

NEW YORK, April 22.-While the NEW YORK, April 22.—While the day's transactions in stocks were generally assumed to be still largely in professional hands, the advance in prices was recognized as a reflection of a real improvement in sentiment towards securities. The expansion in the volume of the dealings was not notable, and business was unduly congested in a few speculative favorites in the same way as for some time past. The manner in which prices rose also served to carry conviction on a response to demand, simply to secure additional holdings at the best possible terms. The object as well as of raising the level of prices was obvious in some of the most conspicuous cases. But the important feature of the market was that the rise, however brought about, did not bring out important offerings for sale.

It is this condition of the market that causes uneasiness to the outstanding short interest, which is admittedly still large. The existence of this persistent short interest, the market invites attack by an opposing bull party in the speculation as soon as the market is freed from actual liquidation on advances. News of events or changing conditions were given little responsibility for the day's movements. A good effect was caused by the downward tendency of time money rates, which was looked upon as a better index of the real money situation that day's transactions in stocks were gen-

dex of the real money situation than the deteriorating condition of the

BALTIMORE STOCK MARKET BALTIMORE, MD., April 22.—Seaboard ir Line, common and preferred—Nothing

NEW YORK, April 22.—The cotton market was rather less active to-day and fluctuations were narrow and irregular, with the close steady at a net decline of 3@8 points. Sales for the day were estimated at 150,000 bales. The opening was steady at a decline of 3@6 points in response to lower Liverpool cables and a rather better weather map than had been loked for, owing to further rains in the Southwest. But offerings wede light, and there was a shurp demand for the near months on prices railed to within a point or two of Saturday's close seon after the opening. Lister the market sagged off in the absence of a brondening demand, but May held a premium of about 19 3points over July, and after sagging off to about the opening fluctures prices held preity steady during the afternoon. The close was at practically the lowest point of the session under scattering liquidation or realizing by buyers of last week. The decline in Liverpool futures was attributed to American selling, which was believed to be

There was one disappointment—the absence of Consul II.—but the general secretary, Mr. W. H. Howden, made excuses for the chimpanzee in such a witty manner that the children enjoyed one more happy laugh.
